

Sustainability and Greenhouse Gas Reduction Policy

Katathani Co., Ltd. recognizes the impacts of climate change and the unsustainable use of natural resources. The company is committed to operating responsibly, with a strong emphasis on balanced sustainable development across environmental, economic, and social dimensions. Our goal is to support business growth while caring for the planet and the community.

One of our key missions is to reduce greenhouse gas emissions from operational processes by improving the efficient use of energy, water, and resources, managing waste responsibly, and fostering environmental awareness across all sectors.

Our operational guidelines include:

1. **Enhancing Energy and Resource Efficiency**
Improve energy and resource use by maintaining equipment in optimal condition to minimize energy loss.
2. **Promoting Responsible Water Use**
Install water-saving systems and devices while encouraging participation from both staff and guests in water conservation.
3. **Implementing Waste Management at Source**
Reduce the use of materials that negatively impact the environment and support the use of recyclable or biodegradable alternatives.
4. **Monitoring and Evaluation**
Regularly track, measure, and evaluate resource usage data to inform future improvement plans.
5. **Communication and Training**
Educate and engage staff and stakeholders to build understanding and active participation in reducing environmental impacts.
6. **Encouraging Collaboration**
Partner with suppliers and local communities to expand the positive impact of sustainability initiatives and support activities that benefit the environment and society.
7. **Policy Integration and Review**
Integrate this policy into the organization's management processes and regularly review it to ensure alignment with changing circumstances.

Katathani Co., Ltd. is committed to the principle of “**Business Growth, Community Participation, Environmental Sustainability,**” and will continue to operate with transparency, responsibility, and long-term sustainability in all aspects.
